

RANJITH V

Full-stack Software Engineer | React | TypeScript | Node.js | NestJS | GraphQL

+91-6383046764 | venuranjith4505@gmail.com | [LinkedIn](#) | [GitHub](#) | Chennai, India

PROFESSIONAL SUMMARY

Full-stack Software Engineer with 5+ years of experience in developing scalable and high-performance web applications using React.js, Redux, JavaScript (ES6+), Node.js, NestJS, and GraphQL. Primarily focused on React-based frontend development with additional experience in Vue.js and Angular. Skilled in building responsive user interfaces, RESTful APIs, RBAC, and backend services using PostgreSQL and Redis. Experienced in performance optimization, clean architecture, and delivering enterprise-grade applications in Agile/Scrum environments. Strong focus on writing maintainable, reusable, and efficient code while translating business requirements into reliable technical solutions.

CORE SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS, SQL

Frontend: React.js, Redux, Redux Toolkit, React Hooks, Context API, Vue.js, Angular, Responsive UI Development, Recharts

Backend: Node.js, NestJS, Express.js, GraphQL, RESTful APIs, API Integration, Strapi CMS

Databases: PostgreSQL, MySQL, Redis, Query Optimization, Database Indexing

Auth & Security: JWT Authentication, Role-Based Access Control (RBAC), Secure Data Handling

Tools: Git, Postman, Jira, Agile/Scrum, Data Visualization, Geospatial Mapping

PROFESSIONAL EXPERIENCE

Cloud Ripples Private Limited | Chennai, India

Software Engineer | Apr 2023 – Present

Associate Software Engineer | Apr 2022 – Mar 2023

Trainee Software Engineer | Apr 2021 – Mar 2022

Tech Stack: React.js, Redux, JavaScript (ES6+), TypeScript, Vue.js, Angular, Node.js, NestJS, GraphQL, PostgreSQL, Redis, Strapi CMS

- Developed scalable, high-traffic React.js applications with responsive and performant enterprise-grade user interfaces.
- Built reusable UI components and integrated backend services using React.js, Node.js, NestJS, and GraphQL for end-to-end feature delivery.
- Optimized GraphQL APIs using Redis caching and query enhancements, reducing response time by up to 50%.
- Improved frontend performance by ~40% through code splitting, lazy loading, and optimization techniques.
- Implemented Role-Based Access Control (RBAC) for secure access management across 500+ users.
- Developed interactive dashboards and real-time data visualizations using Recharts to improve business insights.
- Automated CSV import workflows in Strapi CMS, processing 10,000+ records and reducing manual effort.

KEY PROJECTS

Data Analytics & Management Platform

Tech Stack: React.js, Node.js, PostgreSQL, Redis, Recharts, Geospatial Mapping

- Developed a scalable two-tier platform consisting of a React.js-based CMS and a public-facing application, enabling non-technical users to manage and publish complex datasets efficiently.
- Built 5+ interactive dashboards using Recharts (bar, pie, and line charts) to transform CSV data into real-time business insights and visual reports.
- Integrated geospatial mapping features to visualize regional data trends and improve user engagement through interactive map-based analytics.

- Optimized API performance using Redis caching and PostgreSQL query optimization techniques, reducing API response time by 50%.
- Collaborated with cross-functional teams to deliver scalable, responsive, and data-driven web applications aligned with business requirements.

Data Repository & Management System

Tech Stack: React.js, Strapi CMS, Node.js, AWS Lambda, PostgreSQL

- Developed a React.js-based frontend integrated with Strapi CMS to manage structured datasets and dynamic content through a centralized admin dashboard.
- Automated large-scale data ingestion by implementing custom CSV import functionality within Strapi CMS, processing 10,000+ records while significantly reducing manual effort and data errors.
- Built serverless data processing workflows using AWS Lambda to efficiently fetch, transform, and manage large datasets.
- Developed interactive data visualization features, including charts and geospatial map overlays, for advanced dataset analysis and comparison.
- Optimized application performance and data handling workflows to support scalable public-facing data access and reporting.
- Collaborated with cross-functional teams to deliver scalable and maintainable data management solutions aligned with business requirements.

Certification & Form Review Management System

Tech Stack: Vue.js, Strapi CMS, PostgreSQL

- Developed a Vue.js and Strapi CMS application to streamline multi-step certification form submissions with an intuitive and user-friendly onboarding experience.
- Built reviewer workflows supporting approval and rejection processes across multiple form types with automated status tracking and notifications.
- Developed a responsive admin dashboard to simplify reviewer operations and improve application processing efficiency.
- Implemented frontend form validation and structured data handling in Vue.js to maintain data accuracy and consistency throughout submission workflows.
- Collaborated with stakeholders to enhance usability, optimize workflow management, and improve overall user experience.

Media Management & Distribution System

Tech Stack: Angular, NestJS, TypeScript, RESTful APIs, PostgreSQL

- Developed an enterprise-grade digital media distribution platform using Angular and NestJS for managing high-volume media asset libraries across global platforms.
- Built advanced media search and content-sharing features to streamline asset distribution across multiple microsites and business channels.
- Implemented workflow-based approval processes for theatrical content releases, ensuring compliance with content review and publishing standards before distribution.
- Designed responsive web interfaces optimized for desktop and mobile devices, enabling high-performance digital asset previews for global users.
- Integrated RESTful APIs and backend services to support scalable media management and seamless content delivery workflows.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science | 2022 – 2025

St. Peter's Institute of Higher Education and Research, Chennai

Completed via part-time / shift program while working full-time as a Software Engineer.

Diploma in Computer Engineering | 2018 – 2020

Murugappa Polytechnic College, Chennai
